Extreme
MAKEOVER
HOME EDITION

SASCO Fasteners, in Medford, Oregon, was asked to be the fastener supplier for the recent Extreme Makeover/Home Edition. Ark Build, of Medford, was the head builder for this amazing project, supervising the complete building of a new house for a deserving local family. “When I was asked to participate, I had no idea who the recipient family would be. It really made no difference in my decision to help, I was just glad to be there”, said **Steve Dunham** SASCO’s President.

As it turned out, the recipient family was a family that SASCO had worked with some years before as a Sparrow Club sponsor, and Steve had just spoken with them earlier regarding donations to the local hospital foundation.

Framers, electricians, plumbers, mechanicals, structural iron workers, masons, roofers and landscapers from the local area all donated their time. Local supply houses donated many needed materials.

“The project was to build a new home in 108 hours, STRAIGHT! “ I knew that my role in this team effort was to be there when I was needed. We must have made 10 job site deliveries during the 4½ day “build”, including the weekend, and a 2:30am “midnight” bolt delivery”

Having good local inventory, as well as the help of some of our key suppliers, made this project go as smooth as any Extreme Makeover build ever, according to the show’s producers.

SASCO would like to thank supplier partners **Powers Fasteners, Intercorp, Porteous Fasteners, Lenox Tool, Irwin Tool** and **Champion Cutting Tools** for their assistance in this great project. The episode should be airing sometime in November 2011.
